5 KEYS TO PCM'S QUALITY PRODUCTS

PREMIUM FIT AND FINISH

Fit and finish come from great engineering, precision cutting and expert bending, welding and polishing. Our craftsmen achieve first rate quality because they take pride in each piece that leaves the factory.

HIGH GRADE STAINLESS STEEL

Why do some stainless steel products look dull and rust? The answer is that some manufacturers cut costs by using inferior grade of steel. We use only high grade 304 stainless steel from reputable suppliers.

ATTENTION TO DETAIL

Corners and edges are where most manufacturers fall down, but here at PCM, our craftsmen have honed unique skills to make strikingly impressive corners and edges.

PROTECTIVE VINYL

Our products are shipped to you with a white vinyl covering to protect surfaces during fabrication, handling and installation. Once the accessory is in place, peel off the protective vinyl to expose the luster and quality of your superior American made outdoor kitchen products.

EXCELLENT HARDWARE

We pride ourselves in choosing the best hardware to use on our products, such as top quality drawer slides and handles.
